SKILLS

Languages:	Python, C, JavaScript, C++,HTML, CSS, Java, Bash
Frameworks:	Metasploit Framework
Tools/Platforms:	MySQL, Windows Server 2025, Linux (Kali, Ubuntu), Git, GitHub, BurpSuite
Soft Skills:	Problem-Solving, Adaptability, Leadership, Critical Thinking

INTERNSHIP

Shadow Fox Link <i>Cybersecurity Intern</i>	Oct 2024 – Nov 2024
- Executed a comprehensive penetration testing workflow, encompassing reconnaissance, vulnerability enumeration, exploitation, and privilege escalation within controlled target environment. - Utilized industry-standard tools for vulnerability validation and exploit execution. - Developed a structured security assessment report detailing identified vulnerabilities, exploitation methodology, risk analysis, and recommended mitigation strategies. Tech Stack – NMAP, Gobuster, Hydra, Metasploit Framework	

PROJECTS

AI-Based Network Intrusion Detection System GitHub	Jan 2026 – Jan 2026
- Designed an AI-powered Network Intrusion Detection System (NIDS) using a Random Forest classifier to detect and classify malicious network traffic. - Built an interactive Streamlit dashboard for model training, packet simulation, and real-time intrusion detection using the CIC-IDS2017 dataset. - Integrated the Groq API to generate AI-driven explanations for detected network packets, enhancing threat analysis and interpretation. Tech Stack: Python, Scikit-learn, Streamlit, Windows/Linux, Groq API, CIC-IDS2017 Dataset	
Keystroke Logging GitHub	Dec 2025 – Dec 2025
- Developed a keystroke logging module in a controlled lab environment to study input-capture attack mechanisms from a defensive cybersecurity perspective. - Implemented structured data handling by storing captured keystrokes in JSON and plain text files to support analysis and auditability. - Tested and analyzed the implementation within a Windows-based environment to evaluate system behavior, security risks, and mitigation strategies. Tech Stack: Python, Windows OS, Structured Logging, File Handling	

TRAINING

Cybersecurity Essentials Lovely Professional University	Jun 2025 – Jul 2025
- Acquired a foundational understanding of core networking principles, including protocols, addressing schemes, and network security fundamentals. - Gained hands-on exposure to baseline cybersecurity and ethical hacking tools used for reconnaissance, scanning, and preliminary vulnerabilities. - Obtained essential understanding of cyber laws, regulatory obligations, and fundamental security best practices relevant to responsible cybersecurity operations.	

CERTIFICATIONS/CERTIFICATES

• Certified Secure Computer User (C SCU EC-Council	Aug 2026
• Cybersecurity Essentials NASSCOM India	Jan 2026
• Cybersecurity Attack and Defense Fundamental Specialization Coursera	Sep 2025
• Cybersecurity Essential Lovely Professional University	Jul 2025
• Computer Communication Specialization Coursera	Nov 2024
• Ethical Hacking Rising Tech Pro	Mar 2024

ACHIEVEMENTS

• Secured Top 4% globally on TryHackMe

EDUCATION

Lovely Professional University <i>Bachelor of Technology - Computer Science and Engineering – CGPA: 6.84</i>	Phagwara, Punjab Aug 2023 – Present
Narayana e-Techno School, South City - II <i>Intermediate; Percentage: 65%</i>	Gurgaon, Haryana May 2020 – June 2022
Christ Church High School <i>Matriculation; Percentage: 76%</i>	Patna, Bihar Feb 2019 – Jun 2020
